DETAILED ACTION

Formalities

1. The preliminary amendment filed with the application has not been entered because it does not comply with the required format of amendments set forth in 37 CFR 1.121(c) and 1.121(b)(2). Applicant should submit an amendment in response to this office action properly complying with 37 CFR 1.121(c) and 1.121(b)(2) in order to have the claim amendments entered.
2. The examiner notes the search report from the corresponding PCT application and has considered the references cited there. However, unless Applicant expressly cites them on an Information Disclosure Statement (or if cited by the examiner), the references will not appear on the face of any patent granted on this application.

Claim Objections

3. Claims 4-21 and 23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 3-21 and 23 have not been further treated on the merits.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims

are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-3 and 22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-47 of U.S. Patent No. 7,740,745. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the '745 patent include an electrolytic cell using the claimed electrolyte composition and including an anode with an active cobalt oxide

electrocatalyst. Thus, the claims of the '745 patent are entirely encompassed by the present claims (i.e.-the claims of the '745 patent anticipate the present claims).

Conclusion

The claims are otherwise free of prior art rejections.
